

PEST SEAL®

A E R O S O L

PESTSEAL® AEROSOL is a product of Pest Control (India) Pvt. Ltd., PCI, the pioneers of pest control services and products for over 45 years and is created using one of the breakthroughs in pest control technology – CPF.

CPF is PCI's special Cypermethrin-Pyrethrin Formula, bringing together two of the world's most effective insecticides, so powerful that you need to use only a fraction. CPF endows **PESTSEAL®** AEROSOL with a 3-way advantage :

- **Rapid kill, fortified by Pyrethrum – ensures quick knockdown**
- **Flushing out of insects; irritation caused by the chemicals forces them to flee**
- **Residual action; anti-feedant property prevents the insects from feeding in sprayed areas**

PESTSEAL® is a multi-purpose aerosol effective against all flying and crawling insects such as cockroaches, mosquitoes, flies, bedbugs, ants, moths and silverfish. These pests hide behind cabinets, loose joints in furniture and kitchen shelves, behind the gas cylinder and refrigerator, within cracks in walls and floors...places that are usually inaccessible to insecticides. **PESTSEAL®** penetrates into the deepest cracks and crevices, seeking out and destroying the insects hidden within. The special CPF formulation remains effective for weeks after spraying, and keeps your premise insect-free for a longer period. Now available with spray-through cap for maximum convenience.

Packing : 500ml & 320ml cans in shipper carton of 30
