

termiseal®

Your home faces a deadly yet silent threat everyday. One you cannot see and least expect. Termites, often mistakenly referred to as *white ants*, enter your home in search of their food - your furniture and wood-work. Other wood infesting pests such as powder post beetles can survive in untreated wood for many years - their larvae go on chewing their way from the inside, often severely damaging wooden articles before you discover the infestation. By then it may be too late. What follow are sleepless nights and a feeling of utter helplessness and despair. Why go through all this when a solution is at hand?

termiseal® from Pest Control (India) Pvt. Ltd., PCI, is specially formulated to combat the threat from termites and other wood-boring pests. **termiseal®** contains Chloropyriphos 2%, the only registered ready-to-use formulation against wood destroying pests, available in the market today.

Features that have made **termiseal®** the most popular product of its kind :

- Ready-to-use
- No mixing required
- Easy-to-use - brush it, spray it, swab it or inject it
- Also effective against other household pests like cockroaches, ants, bedbugs, silverfish

PREVENTIVE & CURATIVE

- Early application prevents infestation and forms a chemical barrier
- Destroys insects in infested areas and forms a chemical shield against further attack

PACKING DETAILS :

Available in 4 convenient sizes : 1/4, 1/2, 1 and 5 litre tins at all leading hardware and other stores
